¹The temperature range indicates the range in which the encapsulated cells can operate. The performance of the cells may vary if they are continuously operated outside a temperature range of -20°C to 55°C, and/or at C-rates higher than the maximum charge/discharge rate specified in this spec sheet. The operating temperature range of the module varies based on the application. If the module is to be operated continuously outside a temperature range of -20°C to 55°C, and/or at C-rates higher than the maximum charge/discharge rate specified in the spec sheet, please consult Enercap or its Reseller prior to deploying.

²Warranty conditions will apply. Please consult your, Reseller or Enercap for warranty conditions applicable to your region.

³Projected life of encapsulated cells. Cycle life will vary if cycled more than 4 times a day.

⁴Additional terms and conditions, including a limited warranty, will apply at the time of purchase.

⁵Projected Calendar life of encapsulated cells from the date of first operation.

⁶Shelf life is the life of the module (in years) from the date it is manufactured to the time it is first operated
